# BOARDS & SCOOTERS

LONGBOARDS / SKATEBOARDS / SCOOTERS / ACCESSORIES

TEMPISH company was established in 1994 so this season, we celebrate 25 years of experience in the fields of development and trade of sport equipment both in the Czech as well as global markets. Since its establishment, the company has devoted itself to the production and wholesale of sports goods which the company introduces on the market under its own brand name TEMPISH. The main products are inline skates which TEMPISH company delivers to more than 40 countries in the world.

The substantial expansion of the collection came in 1999 when TEMPISH company added ice skates and accessories to its offer. In the following years, the assortment was further expanded by scooters and skateboards. Currently, the company cooperates with the best Czech floorball teams and devotes itself more and more to developing of top floorball equipment.

The main goal of TEMPISH company is to develop high-quality sports equipment that will be affordable to the wide public. In last few years, the company has been putting emphasis on developing and testing its products by professional sportsmen who are used to the best sports equipment. This trend pushes all products of TEMPISH brand much further.

To our satisfied customers belong professional racers as well as roller-skate beginners. The development defines our racing collection, experiences and innovations are then expressed in our other products. We want to offer the people who put their trust into TEMPISH roller-skates the best possible value.

**TEMPLEISH**

Boards designed for long distances, made of Canadian maple have the ideal weight and size for those riders who are looking for speed in large hills or mountain passes. These boards can handle high speeds, eliminating the chances of vibration when you are riding. Each model comes with a special heavy duty griptape, this allows your feet to be more secure on the board.

These boards are for those riders who are looking for speed and tricks, all these boards are made to be stiff enough for decreasing the chances of vibration and rebound feeling over the board, designed to maintain stability and also for those looking for mobilizing as well.

Boards designed for street lifestyle, you can use them to go to your school, university, work, skateparks, bowlparks and also in the nearest corner of your house with your homies, these boards are specialized to ride and make some tricks like "ollie", "kickflip", whatever your crazy head can imagine.

Surfing style are boards for cruising and carving, designated as a cruiser it is a typically a little shorter than a standard longboard with soft wheels 78A to feel the real sensation of the sea in the street. The Surf edition comes with a special truck which can replicate the feeling of a surf board.

If you like boards that hold their line well in turns and don't slide out very much, then keep an eye out for this symbol. That doesn't mean that they won't slide at all, rather they're typically set up with lipped wheels that grip better while maintaining speed, our Tempish wheels Flows 70mm 78A.
