# **WE ARE ePERFORMANCE**

It's us, as a team and global movement

It's now, always present

We have created a whole new category: sportive eBiking

**DESIGNED & ENGINEERED IN GERMANY**

A mountain biker in a red and blue jersey and black helmet is captured mid-air, performing a jump over a dirt trail. The background is a blurred, rocky, and blue-toned landscape. The text is overlaid on the lower half of the image.

**TWO CLASSES OF BIKES, ONE VISION:  
WE ARE ePERFORMANCE**

**XDURO**

**XTREME MODELS**

**PAGES 31 - 56**

- **DESIGNED FOR EXTREME TERRAIN**
- **PERFORMANCE FOCUSED**
- **PROGRESSIVE GEOMETRIES AND SPECS**
- **PRECISE, AGILE HANDLING**

A photograph of two mountain bikers riding on a dirt trail. The trail is light brown and rocky, winding through a landscape of green and brown shrubs. In the background, a blue ocean stretches to the horizon under a blue sky with white clouds. The bikers are wearing helmets and jackets. The text 'WHAT KIND OF RIDER ARE YOU? XTREME OR SPORTY?' is overlaid in white, bold, sans-serif font in the center of the image.

**WHAT KIND OF RIDER ARE YOU?  
XTREME OR SPORTY?**

**SDURO**

**SPORTY MODELS**

PAGES 57 - 141

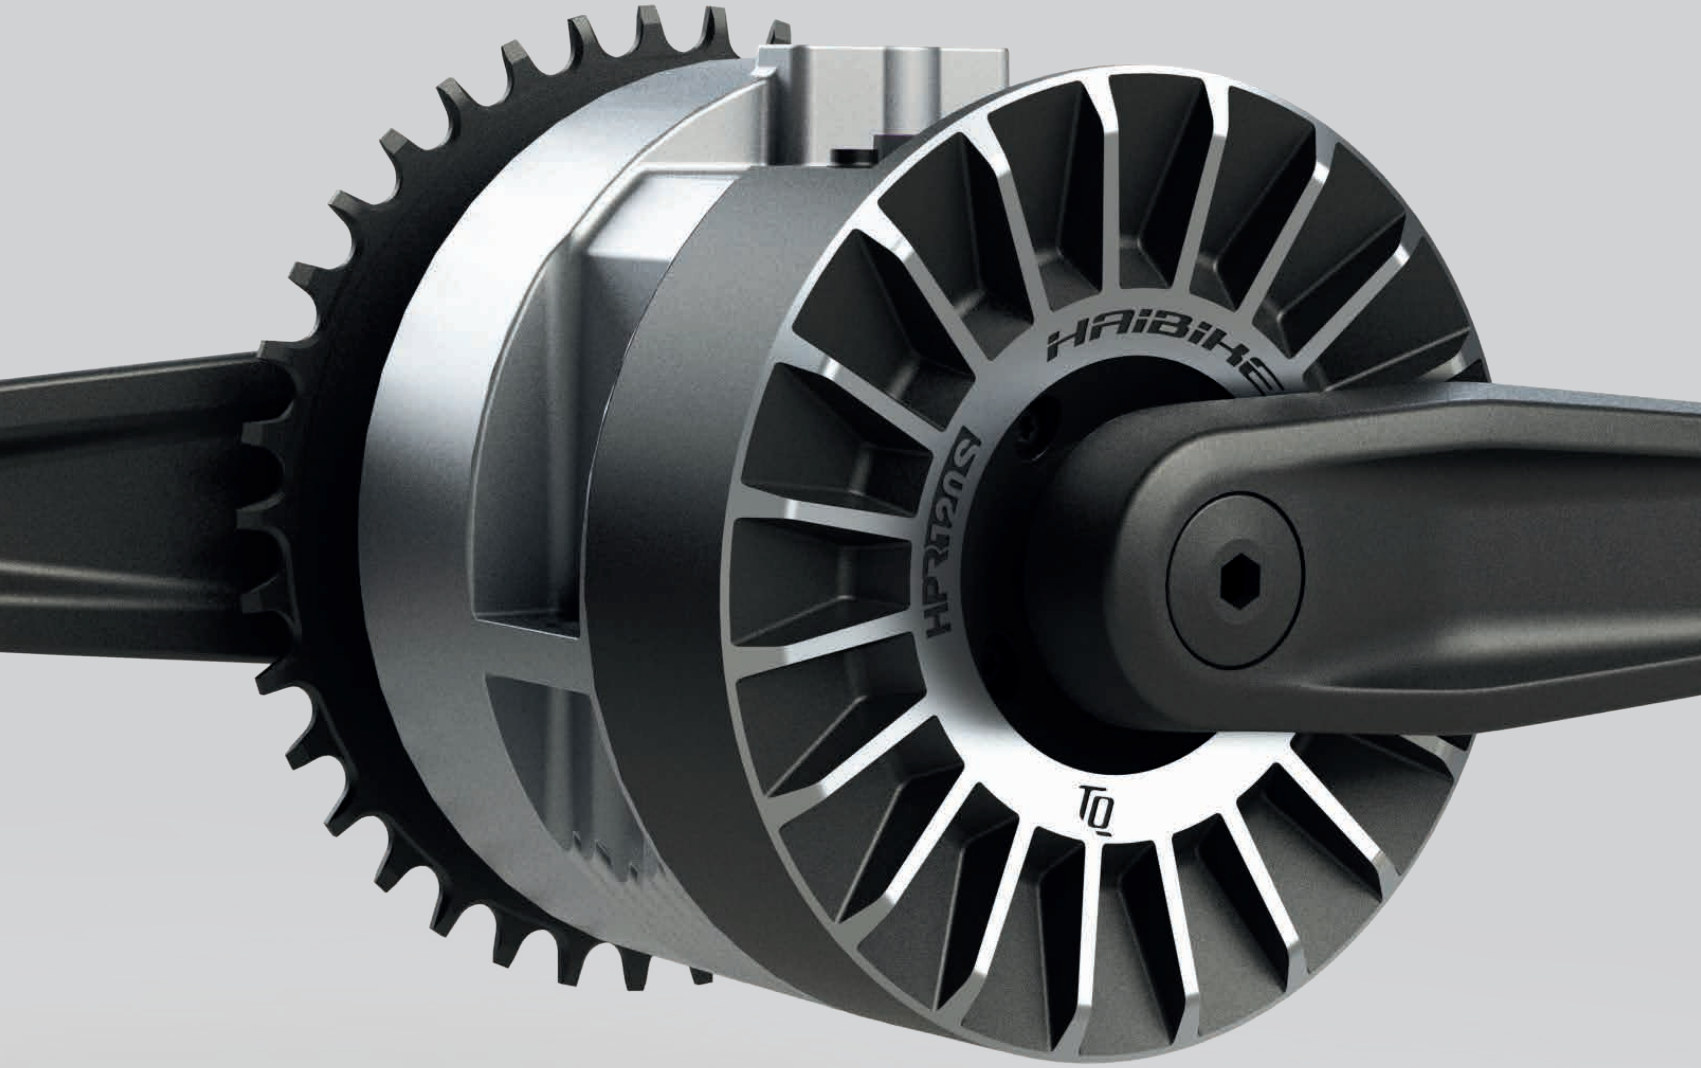

**DESIGNED FOR LIGHT TO MEDIUM TERRAIN -  
SPORTY BUT RELAXED -  
COMFORTABLE GEOMETRIES -  
EASY-TO-HANDLE, FORGIVING, SAFE -**

Discover a world full of new possibilities. Exploring new frontiers, by day and by night. With FLYON, we are introducing the next generation of ePerformance. New motor, innovative operating concept, more connectivity and intelligent design: Whether in terms of integration, digitisation or performance - FLYON sets new standards in the high-end sector. Behind the first Haibike-own ePerformance system stands German engineering power combined with intelligent technology and many years of know-how. All components have been developed by Haibike and fit in a system that can be operated easily and intuitively.

"The eBike as we know it was completely rethought in order to launch the next generation of ePerformance. With FLYON we have been able to create a system according to our understanding and concepts which feels exactly the way an eBike should be ridden in our opinion. - Ingo Beutner, Head of Engineering

# RIDE OR FLYON

**HAIBIKE**  
**ePERFORMANCE**  
**SYSTEM**

COCKPIT  
**HABIKE REMOTE**

For the central interface between rider and system we developed a remote that can be operated intuitively, which follows the compact FLYON design language and provides perfect ergonomics: The mode switch is assembled below the handlebar and can be reached via thumb even during the ride. Not only the mode display serves as feedback, but also a clearly visible LED strap on the remote which changes the colour depending on the level of assistance.

**FLYON**

**“EVERY DISPLAY HAS ITS CLAIM OF ENTITLEMENT ON THE EBIKE WHEN IT IS WELL PLACED AND REPRESENTS A DISTINCT ADDED VALUE FOR THE RIDER. THE OPERATION, THEREFORE, HAS TO BE INTUITIVELY AND SELF-EVIDENTLY.”  
- INGO BEUTNER, HEAD OF ENGINEERING**

COCKPIT

### **HAIBIKE HMI & SYSTEM CONTROL**

The colour display centrally positioned above the stem is easy to read in every situation due to the transfective design. Current riding data and system information are displayed on four changeable screens. It is also possible to display and analyse training-relevant data such as pulse measurement, cadence or calorie consumption.

**HAIBIKE  
ePERFORMANCE  
SYSTEM**

#### FRAME

### **ALL NEW CARBON FRAME**

Formal aesthetic, strong and sturdy: For the FLYON systems we designed a completely new frame platform made of high-quality carbon. With regard to the optics, the Haibike ePerformance system convinces with a high level of integration. Furthermore, we developed a new, space-saving mounting possibility for the energy storage system: The opening of the frame, which gets lighter and also more stable, is reduced by pushing the battery longitudinally into the down tube:

#### INTEGRATION

### **TTL - TWIN TAIL LIGHTS**

With the Haibike Twin Tail Lights you are able to cope confidently with tours even by night. Eight highly-efficient LEDs make the eBike easily visible also from the side.

# FLYON

PROTECTION  
**THE HAIBIKE SKIDPLATE**

The Haibike skidplate is a motor cover made of fibre-reinforced plastic and protects the motor effectively from environmental influences such as shocks, dirt or stone impact.

ENGINE  
**HAIBIKE HPR120S**

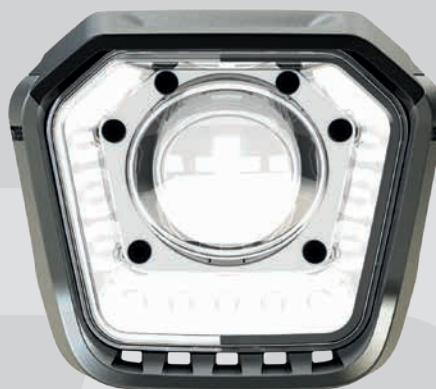

Conquer steep ascents, “fly” over trails, explore new frontiers and extend them: An extra strong power package - made in Germany - ensures the necessary power. Together with the technology supplier TQ we developed a dynamic motor that is the most powerful mid motor on the market at the moment providing up to 120Nm torque. Thanks to the patent Pinring gear the motor acts extreme powerful in very small spaces.

**HAIBIKE**  
**ePERFORMANCE**  
**SYSTEM**

LIGHT

### HAIBIKE SKYBEAMER

Why only master difficult trails and demanding routes by day? We answer this question by providing a lighting system that enables riding also by night. The Skybeamer is available in three versions with 150, 300 or 5.000 lumen. With the Skybeamer 5000 we developed an independent system with daytime running light, which provides beside the classic low beam light also a high beam light with over 5.000 lumen. The light can be operated manually via remote or fully automatically via a brightness sensor in the display.

CLEAN

### INTEGRATED CABLE ROUTING

With the FLYON system we were able to set new standards regarding cable routing. Both hardtail and full-suspension bike - all electric, hydraulic and mechanical cables are fully routed in the frame. This not only ensures reliability, but also extremely clean optics which gives the FLYON models beautifully shaped elegance.

# FLYON

CHAIN RING

**HAIBIKE DESIGNED & ENGINEERED 42T/38T**

A specially constructed Direct Mount chain ring in unique design with 38 or 42 teeth transmits the motor power reliably to the drive train.

BATTERY

**HAIBIKE INTUBE BATTERY 630WH**

Together with our technology partner BMZ we developed a 48 Volt energy storage system with an extremely high energy density and 630Wh capacity. On the inside, the battery connects via magnet and can be locked theft-proof by a lock developed in collaboration with ABUS. The battery level can be checked via touch sensor.

**HAIBIKE**  
**ePERFORMANCE**  
**SYSTEM**

SPEED SENSOR

#### INTEGRATION

#### **SPEED SENSOR DISC**

A newly developed speed sensor disc sends 18 signals per wheel rotation to the system and measures speed 18 times more accurately than all other systems available on the market. In this way, the system is able to react significantly faster and more dynamically to changing requirements and recognises accelerations even at lowest wheel motions, e.g. hill starts. The sensor itself is safely positioned and reliably integrated in the left frame dropout.

# FLY ON

BLOCKING HEADSET  
**STEERING LOCKOUT**

The Block-lock headset in the new FLYON models limits the steering angle to the left and to the right. This makes it possible to effectively avoid impacts on the top tube or paint damages caused by the handlebar or mounting parts such as brake or shift lever.

**HAI BIKE**  
**ePERFORMANCE**  
**SYSTEM**

MRS

### INTUBE BATTERY CONCEPT (IBC)

Our Intube Battery Concept enables a high level of integration, formal aesthetics as well as functionality. For the new model year we offer an even wider range of models equipped with a battery which is integrated into the frame (Bosch PowerTube battery, Yamaha Intube 500Wh battery & FlyOn). Our patented Modular Rail System, which enables quick a. easy mounting of different accessory to the frame, forms the perfect complement.

# MODULAR RAIL SYSTEM (MRS)

## **MODULAR RAIL SYSTEM (MRS)**

Our **patented MRS** allows various accessories to be attached to the bike quickly and easily. A fastening rail is integrated into the upper side of the down tube and allows a **drinking bottle** or **bag** to be **mounted in any desired position**. This means the tools you need during a trip are always within reach.

## THE RANGE EXTENDER

Perfect for long tours: An additional PowerPack battery can be mounted in just a few steps to our hardtails with a Bosch eBike system. This enables achieving a significant higher reach with up to 1.000 Wh.

## THE MULTIMOUNT

The Multimount is an adapter for universal mounting of bike accessory in the Haibike Modular Rail System. Accessory such as bottle cages or folding locks up to a weight of 1.5 kg can be assembled onto the mounting rail which is integrated into the top of the down tube using the Multimount set (two adapter discs, screws and nuts).

S O R E S

**THE BOTTLE**

TheBottle is mounted on the MRS via the magnetic FidLock system for easy operation and a secure hold. Despite 650 ml of capacity, the bottle can be mounted on any frame with MRS.

**THE RAIL LOCK**

Low weight and amazing flexibility make TheRailLock a perfect security solution for your eBike. The separately available plug-in cables and chains (TheCableLock & TheChainLock) make TheRailLock an effective anti-theft device that can be combined with any MRS accessory.

# eConnect

powered by  
Deutsche Telekom

## THE WORLD'S FIRST CONNECTIVITY SYSTEM FOR ePERFORMANCE BIKES!

### New design. New features.

#### Free update for the app: eConnect 2.0

Immediately after the Eurobike 2018, the update for the eConnect app can be downloaded in corresponding app stores. Also the eConnect online portal got a new look with a user-friendly navigation. In this online portal all data can be retrieved and exported on the computer as well. The eConnect app is available in **8 languages** (German, English, French, Spanish, Czech, Polish & Dutch) for iOS and Android devices.

#### Dashboard with a new look (image on the right)

After the update the dashboard appears in a modern **tile design** with a clear navigation through all important features and data:

#### 1) Image of the eBikes with status overview:

- eConnect anti-theft protection active/inactive
- total distance of the eBike
- total riding time of the eBike
- with Yamaha drive unit PW-X with percentage Battery level indicator

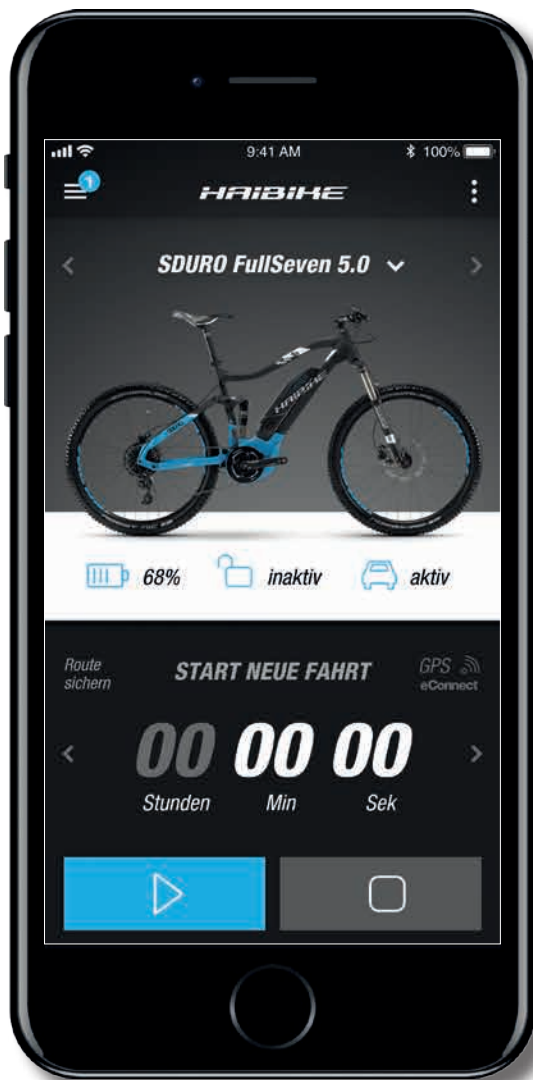

#### 2) Manual track logs for better accuracy

- state eConnect GPS and mobile communication signal strength
- start - stop button / timer

#### 3) current location of the eBike (overview map)

#### 4) overview "my rides" and

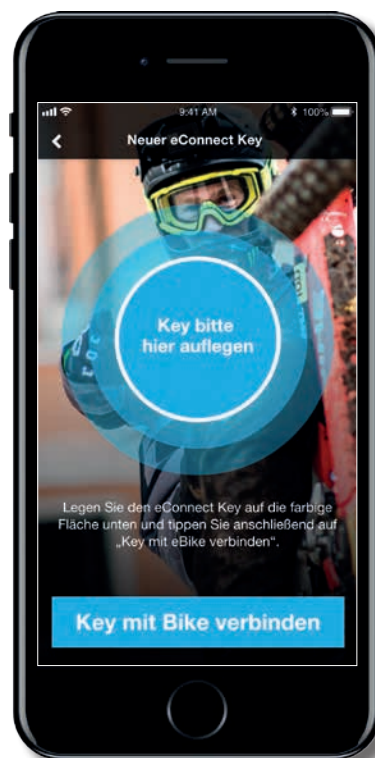

#### 5) display "my last ride" (overview map)

### Dashboard with new look

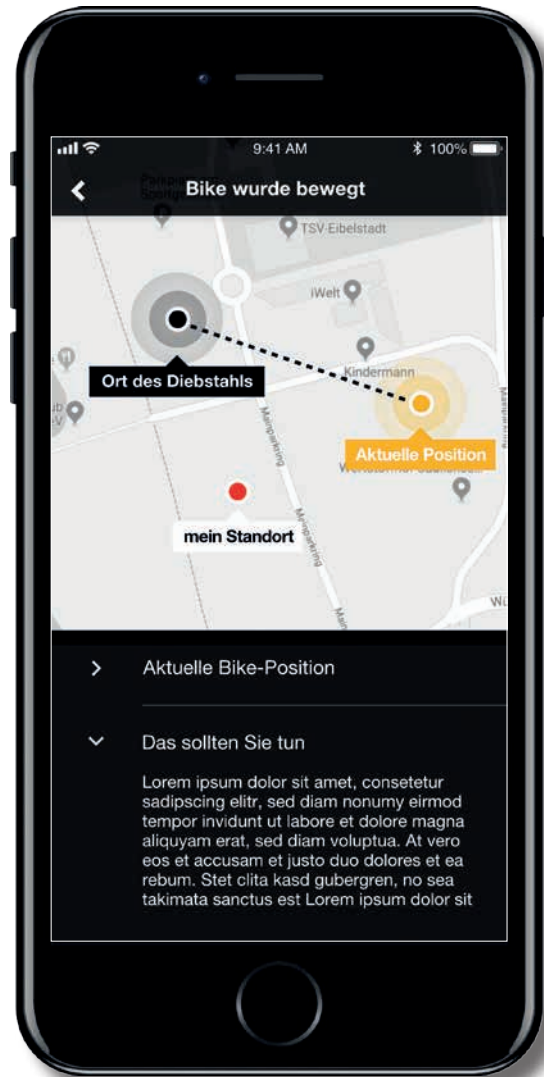

The first successful edition is now followed by eConnect 2.0 with a modern and user-friendly design as well as with advanced features.

**Connectivity-System für ePerformance**  
Digital network of the eBike with completely **new intelligent features** which make the Haibike even smarter and safer.

## The eBike calls for help if necessary

The sensor technology of the intelligent eConnect system also senses quickly and reliably in unusual situations, for example in case of an accident. If speed slows down very abruptly and the eBike falls to the side, the owner receives a message on his smartphone. If the rider does not react after a certain period of time, an automatic emergency SMS is generated to two emergency numbers predetermined by the rider. In the **new eConnect 2.0 App**, the users can transfer their emergency contacts directly from the smartphone.

## Automatic notification in case of theft

If the bike is moved from the defined location, the owner receives a message on his smartphone including all relevant data, e.g. last and current location, which can be forwarded to the police or insurance.

# eConnect

**NEW DESIGN. NEW FEATURES.**

### GPS-based monitoring function

The Haibike eConnect offers a GPS-based monitoring function which can be easily activated via app or is provided **automatically** as well as **contactlessly** via the **Haibike Key** - a small transmitter for key ring attachment.

### Improved track log

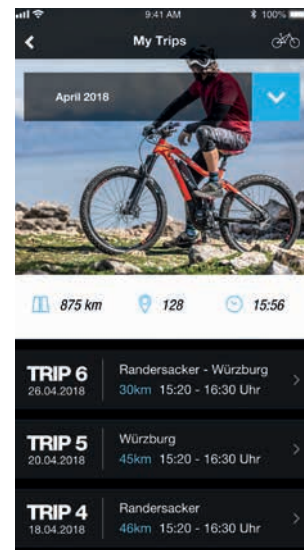

Using the data transferred by the GPS transmitter in the eBike, the rider is able to check the location of the eBike via app and online portal at any time. Furthermore, it is possible to record and store tracks that can be shared with other users. Up to now, eConnect has recorded all tracks automatically. With the update the user is able to start and end the track log actively. After finishing a ride, the route is stored in the cloud and can be exported.

**The route display was also expanded:** Route and recorded riding data, e.g. **total km, riding time, speed, modes** or **cadence** can be checked via app and online portal also after finishing the ride. One new feature includes the clear month view of all recorded tracks.

### Keyless Protect

Bluetooth sensor key for activation

### **BOSCH PERFORMANCE CX**

The Bosch Performance CX motor was developed with a focus on creating a more sport oriented unit. The motor offers an impressive maximum torque of 75 Nm. The “Direct Flow” technique also guarantees powerful support in the lower cadence levels. Trail Control offers a dynamic power management system that allows the rider to choose the optimum support level (50–300 %) for the terrain they are riding, their riding style, and the distance they are looking to cover. “Shift detection” protects your chain by cutting off the torque from the motor during shifting for smooth gear changes.

### **BOSCH ACTIVE LINE PLUS**

Offering a wide range of support, the versatile Bosch Active Line Plus motor joins the ranks between the Active and the Bosch Performance Line. Due to the perfectly regulated acceleration, the drive unit enables smooth and reliable support without lacking in agility. The silent, small and light-weight 3.2 kg drive unit is yet extremely powerful and accelerates harmoniously and dynamically up to 25 km/h with minimal pedal resistance. The max. torque of up to 50 Nm together with the intelligent 3-sensor concept, which records riding data over 1.000 times per second, ensure a superior riding experience. Gradients and longer tours are easy to cope with thanks to a maximum of 270 % pedal assistance. Thus, the Active Line Plus is the perfect companion to discover new places and extend already travelled routes. Furthermore, the drive unit is also available with back pedal function.

### **YAMAHA PW-SE**

The PW series SE inherits all the popular features of the first-generation PW, but with improved cadence. Instead of 100 rpm the system now comes with 110 rpm as well as new Bluetooth connectivity.

### **BOSCH PERFORMANCE CRUISE**

The Performance motor is a powerful and reliable drive unit built for fast pedelecs. With 250 watts of power it supports the rider up to 25 km/h of speed. The advanced 3-sensor system detects torque, cadence, and speed 1,000 times per second and sends the information to a powerful processor in almost real time. The extremely fast and precise motor control of the Bosch drive unit ensures accurate and timely responses while you're riding.

### **YAMAHA PW-X**

The new compact and more powerful Yamaha PW-X motor was designed and developed for demanding ePerformance use. In comparison to the PW motor, its weight was reduced by nearly 400 g to 3.1 kg, as well as its size, which was reduced by -13%. An additional support level provides more power all the way up to high cadence ranges of 120 revolutions per minute. Despite having torque of up to 80Nm, the PW-X system provides a smooth, more silent and more natural driving experience. All rotating parts have been optimized with a focus on weight reduction. As a result of the lower inertia caused by this weight reduction, these parts can move with greater efficiency relative to the input from your pedals. Combined with the new refined freewheel design which creates a rapid engagement of the cranks, the result is a significantly more responsive motor, which provides a new level of a natural riding feel.

**BOSCH PERFORMANCE CX**

**BOSCH PERFORMANCE CRUISE**

**BOSCH ACTIVE LINE PLUS**

**YAMAHA PW-X**

**YAMAHA PW-SE**

**BOSCH / YAMAHA**

# DISTINGUISHED 2018\*

## Our design- /innovation awards

### \*Our awards of the last years.

Year after year our bikes and e-bikes garner a number of awards, test victories and prestigious design awards. The list has in the meantime become long and yet for us every single recognition is a confirmation at the same time. For that, we have identified a new trend and we have embarked on the right way with a product. At the same time, our employees draw new motivation to keep going and never stall.

## Discover younit!

### Further development!

#### Younit shows, how retail trade works today

By introducing the DealerCenter, Winora ushered in a new era of specialist trade. In 2014, the world's first interactive MultiMedia information and consulting system especially for the specialist trade was launched. The award-winning DealerCenter quickly and easily summarizes all products and all relevant information in a digital **point of sale**. This year, Winora is launching **the next generation: Younit - For perfect rides**. ... with a **modern design, a portable desktop version and new consulting tools**, such as **BIKE SIZING by SMARTFIT**.

The first version has proven to be a comprehensive **care-free package** for dealers which considerably valorises the specialist trade. With its interactive catalogue, the smart **consulting tools** and the extensive **media library**, the system provides preparatory work for consulting offered by a specialist dealer and at the same time bridges the time gap for end consumers.

Side face

  
**younit**  
For perfect rides.

## Younit - that's new:

Younit is available in three different versions:

Package S*	Package M*	Package L*
39,- €	59,- €	89,- €
Portable desktop version with 13.3-inch monitor	Stationary version with 24-inch monitor	Stationary version with 32-inch monitor

The new **portable desktop version** enables specialist dealers to offer **mobile consulting**: Whether at the shop counter or directly on the bike - the **portable consulting system** can be used flexibly in the salesrooms. Furthermore, all dealers can access the new **Accentry B2B shop** which enables them to check the availability of all products in real time and place orders at any time.

### **Bike Finder: Which bike is the right one for me?**

If you are looking for a bike, the new **interactive consulting** tool helps you to take a decision: The Bike Finder asks questions on the customer's riding behaviour, habits, as well as personal preferences and determines a **selection of suitable bikes** based on this information. In the extensive **media library**, the customers get some tips on all bike aspects and explanations about technical background.

\*Conditions: 3-year leasing contract, incl. full hardware-pro support, access to all extensions and new features, as well as automatic hardware updates after 3 years, plus a standard service charge of 399.- euros.

**Personal data can be retrieved via QR at any time**

The **digital bike catalogue** offers a clear presentation of all products including detailed information about specifications and geometry of the bikes. In the Dealer Center, the customer can set up a list of favourites and send it to a desired email address. All data can now additionally be stored via **QR code** and be retrieved via camera scan at any time.

**Well prepared for the future**

Within the next months additional functions will be available. In addition to numerous new features, **140 Bike Parts brands** as well as **EXCLUSIVELY all brands of Accell Group** will be available in the future.

**A WHOLE NEW WORLD!**

**Convincing presentations in perfect HD quality! Interested?**

Please contact **Christopher Bindseil**  
**+49 (0) 97 21 / 65 01 92** or your sales rep.

**AVAILABLE IN AUTUMN! ORDER NOW!**

# CATEGORIES OF VEHICLES

Vehicles in **category 0** are usually 12" children's play bikes and 12" and 16" children's bikes.

Vehicles in **category 1** are usually bikes, Pedelects / S-Pedelects that are racing bikes or fitness bikes (urban bikes).

Vehicles in **category 2** are usually bikes, Pedelects and S-Pedelects that are city, trekking, cross-trekking or cargo bikes, as well as 24" bikes for young people and 20" children's bikes.

Vehicles in **category 3** are usually bikes, Pedelects / S-Pedelects that are mountain bikes intended for cross country, marathon and tour riding, as well as all Cyclo-Cross and All Track bikes.

Vehicles in **category 4** are usually bikes, Pedelects / S-Pedelects that are mountain bikes intended for all mountain riding.

Vehicles in **category 5** are usually bikes, Pedelects / S-Pedelects that are mountain bikes intended for Enduro, Freeride and Downhill riding.

Please read the operating instructions.

Dear specialist dealer,

To being able to grant a smooth and quick processing of your enquiries and complaints and to offer you the best service possible it is essential that we receive all necessary information promptly and in compressed form.

On the following pages we would like to provide all important information a.o. about warranty, rules and complaint processing (e.g. damage in transport).

Further resp. more specific info about our products and these topics you can find in our Winora Group basic manual, which is enclosed to each of our bicycles and which are also available on our homepage [www.winora-group.de/manuals](http://www.winora-group.de/manuals)

Please note which documentation belongs to our bikes and have to be handed to the end consumer when selling them. The information which documents these are is also provided in our Winora Group basic manual under point „Guide“.

## COMPLAINT PROCESSING

To grant a quick processing the complaint in written form with all necessary documents has to be directed to the following email addresses of our Service team

- [service@winora-group.de](mailto:service@winora-group.de)
- [e-bike-service@winora-group.de](mailto:e-bike-service@winora-group.de)

Important information regarding complaints concerning transport damages and non-complete delivery

- The delivered goods (vehicles: bicycles, pedelecs, s-pedelecs, kids' bikes; spare parts; accessories; etc) have to be checked for completeness and external damage upon receipt.
- Possible damages have to be confirmed by the driver on the consignment note.
- Hidden damage and non-completeness by missing manuals, vehicle documents and/or missing mounting parts or accessories have to be communicated in written form after three working days at the latest. For this you can also use one of the above mentioned email addresses of our Service team.

**Important information on complete complaints by end consumers at the specialist dealer.**

**Besides the product concerned by the complaint the consumer has to approach the dealer with the following documents:**

- Proof of sale resp. date of delivery which is a proof of purchase like invoice or receipt of the vehicle or part.
- The handover certificate filled in by the specialist dealer prior to sale and signed by specialist dealer and consumer  
From model year 2017 on the handover certificate is combined with the vehicle passport (vehicle passport & handover certificate) which the dealer receives with each model of the Winora-Staiger GmbH prior to sale of the vehicle. Vehicle passport & handover certificate can be found on the last pages of the Original Manual.
- Proof of inspections within the deadlines. For this the Service-Proof can be used - it is also found in the last part of the Original Manual.

For more information on intended use, vehicle classes, wear parts, maintenance and care info etc. please refer to the Winora-Group Original Manual and the also to the vehicle enclosed documents or our homepage [www.winora-group.de/manuals](http://www.winora-group.de/manuals)

A valid complaint by the consumer can only be made at the dealer at which he bought the product that is the dealer with whom the sales contract was concluded.

If the vehicle owner instructs an other dealer than the dealer where the vehicle was bought with the complaint Winora-Staiger GmbH will not bear any possibly arising costs - these have to be paid by the customer himself. Please indicate this fact to consumers contacting you for such cases!

Winora-Staiger GmbH reserves the right to charge an additional processing fee for not justified complaints.

**Important information on bicycle collection\***

- Arrange pick-up of a defective bicycle resp. mounting part or accessory via email or fax to our Service Team. As assistance please find the service form on the following pages.
- We can only accept delivery of bicycles which have been picked-up on our account. We have to decline acceptance of any bicycles which are returned to us without pick-up order!
- For not justified bicycle collections we reserve the right to charge you the freight costs for transport and possible re-shipment as well as a handling fee.
- The vehicle has to be returned to us with the original scope of delivery (wheels, saddle, handlebar, baskets, manuals etc.), if nothing other was agreed on with the Service team.
- Pedals must be demounted, the handlebar must be turned sideways and personal items should have already been removed from the bicycle by the dealer. If this should not be the case these parts may only be packed in the box loosely for re-shipment. We will not be liable for any loss.
- For pedelecs and s-pedelecs as well as vehicles with electronically controlled shifting or damping the batteries have to be put in the respective socket incl. charger, display and key(s)
- Furthermore for s-pedelecs the original EG conformity documents have to be returned (otherwise we will charge a processing fee of 80€)
- A copy of the consumer invoice and the service book resp. a completely filled in vehicle passport incl. handover certificate have to be included.
- Bikes retrieved by us have to be cleaned and in transportable state which means packed in full-size cartons, handlebar and saddle protection to prevent transport damage. The forwarder will not accept unpacked bicycles. If you are not able to pack the bicycle as mentioned please contact our service team.
- Upon pick-up of the vehicle you will receive a signed copy of the consignment note from the carrier.

---

\* WE DO NOT ACCEPT THE THE FOLLOWING REASONS FOR A BIKE RETRIEVAL:  
incorrect order, adjustment work at gear or brake, wheel re-centering

## LIABILITY FOR MATERIAL DEFECTS

(formerly warranty)

### Buyer's rights

According to the European Warranty laws, adjusted on January 1st 2002, the retailer is liable for material defects for a period of 2 years. This period starts with the delivery of the product from the retailer to the customer.

Besides the fundamental 2 year period there is also the legal so-called reversal of the burden of proof 6 months past the date of the product's delivery. This means that the legislator set a fiction that any defect that occurs within 6 months of delivery of the product was pre-existent at the time of delivery. Therefore in this case if a defect occurs the seller has to prove that the defect was non-existent at the time of delivery or was caused by improper use or function-related wear. Past that period the buyer has to prove the reverse.

### Note

This regulation applies only to states that have ratified the EU proposal, e.g. the Federal Republic of Germany. Please enquire for the regulations in your country.

### The liability for material defects does not cover....

- defects that were caused by improper use or force majeure. *Information on the proper use of Winora-Staiger GmbH's vehicles can be found in the original manual, that is enclosed with the vehicle.*

- any parts of the vehicle that are subject to function-related wear and tear, as long as there are no manufacturing defects or faults in material.

*Information on which parts are included in the term „wear and tear parts“ can be found in the original manual, that is enclosed with the vehicle.*

- defects that were caused by improper or insufficient care and unprofessionally performed repairs, conversions or replacements of vehicle parts. This includes, e.g. the manipulation of the drive system of a pedelec or s-pedelec.

*Information what Winora-Staiger GmbH sees as proper care and maintenance resp. service intervals can be found in the original manual that is enclosed with the vehicle.*

- defects that were caused by disregard of a potentially necessary replacement of safety related components, like handlebars, breaks and so on.

*Information on safe use and handling of the vehicle can be found in the original manual that is enclosed with the vehicle.*

- defects due to accidents or other unusual external influences as long as they are not caused by faulty information or product failures.

*Information on safe use and handling of the vehicle can be found in the original manual that is enclosed with the vehicle.*

- repairs, that use second-hand components or faults resulting from such repairs.

- defects due to competitive use of a product that has no explicit competition clearance.

*Information on the respective vehicle branch can be found under the intended use section and the specifications in chapter vehicle branches in the original manual that is enclosed with the vehicle.*

- retrofitted parts, that are not part of the scope of delivery at the time of the product transfer or faults resulting from the unprofessional assembly of such parts. Please also note the lines in the vehicle pass & handover certificate intended for remarks. These documents with information about e.g. delivered accessories are filled in by the dealer prior to sale to the consumer

- damages caused by non-observance of the permissible total weight of the vehicle or non-observance of the restrictions on use (kids' seat, etc.).

*Information about specific permissible total weight of every model can be found via the marking on the frame of the vehicle and /or on the carrier. Necessary information about the restrictions on use for the respective vehicle section can be found in intended use and the requirements in the section vehicle category of the original manual which is enclosed to the vehicle.*

- used vehicles which had have a change in ownership before.

Therefore, please draw the customer's attention to the importance of reading the original manual in case of purchasing a vehicle of Winora-Staiger GmbH. This enables the customer to get some detailed information about above mentioned points regarding the vehicle.

## FRAME GUARANTEE

In addition to its legal liability for material defects, Winora Staiger GmbH also provide an additional guarantee for the frame of the vehicle. The guarantee is valid from model year 2017, beginning on the date of sale to the original purchaser...

- Aluminium frame: 5 years
- Carbon frame: 5 years
- full-suspension frame: 5 years  
*(excluding bearings and shock absorbers)*

The guarantee only covers damage to the frame in relation to its quality, durability, and freedom from defects. The cost of carriage of the defective frame, the return carriage, the labour costs for any possible exchange of a defective frame for a new one, as well as consequential follow-up costs caused by a defective frame, are not covered by the guarantee.

If you have any further claims under the guarantee, such as reduction of purchase price, right of renunciation, or compensation for damage against the specialist dealer, they are not affected by this guarantee. The claims exist in parallel. If the frame is exchanged under this warranty, the warranty will expire and will not continue.

Please refer to the preceding chapter – “legal liability for material defects (previously warranty) - the rights of the buyer” – for damage or other occurrences that are not covered by the guarantee and warranty claims. The existing restrictions in this chapter also apply to the Winora Staiger GmbH frame guarantee.

In addition, you should note the requirements for a complaint to be valid. These can be also found in the preceding chapter “legal liability for material defects (previously warranty) - the rights of the buyer”.

# SERVICE GUIDELINE

## SPARE PART DELIVERY IN ADVANCE

Please note the following points when applying for a spare part delivery in advance before submitting a proper complaint:

- Necessary pick-ups will be arranged by us.
- All parts with a value from 20.00€ will provisionally be invoiced. After checking the defective part within the course of the proper and justified complaint you will receive the respective credit note.
- Not justified complaints will be returned to the specialist dealer at his own cost - we reserve a processing fee of 20% of the goods value.
- For complaints of vehicle parts or accessories by the below mentioned brands these have to be returned directly to the manufacturer or distributor with receipt.

## INFORMATION ON EBIKE TEST RIDES

We recommend you to ask your customer to sign an exclusion of liability since his insurance may not cover accidents with ebikes.

## BATTERY RETRIEVAL

For shipment of lithium ion batteries specially marked packaging and documentation is necessary due to transport regulations!

Please use the battery retrieval from.

If you want the return one of these batteries to us, please contact our service department via phone: +49 9721 / 6594-3540 or use the respective form from the guideline.

For Bosch batteries please contact the Bosch Service via phone +49 7121 / 7666000.

## DISPOSAL OF BATTERIES, ACCUMULATORS AND ELECTRIC DEVICES AND PACKAGING

In Germany the Winora Group is connected to the common return system GRS. For more information about the return concept please see the following pages.

For the disposal in all other countries please contact your municipal authority or community and inform your customers if necessary.

Regarding disposal of electric devices as well as packaging and other waste please see the information in the current Winora-Group Original Manual. The chapter „disposal“ contains all necessary information for you and your customer.

For general informationen please visit our recycling-homepage [www.winora-group.com/recycling](http://www.winora-group.com/recycling)

WINORA GROUP  
**SERVICE GUIDELINE**

**OVERVIEW OF THE LEGAL REGULATIONS /  
 GUIDELINES FOR PEDELECS AND S-PEDELECS**

Please note the general definition of pedelecs and s-pedelecs in „guide“ of the Original manual of Winora-Group from model year 2017

legal regulations / guidelines	EPAC up to 25 km/h	S-EPAC to 45 m/h
legal classification	bicycle	light motorcycle (L1e)
insurance classification	bicycle	light motorcycle (L1e)
firmly installed lighting	yes	yes
kids' trailer	yes***	no
cargo trailer	yes***	yes*
helmet mandatory	no	yes**
cycle path use	yes	out-of-town: yes, but no obligation in town: no, cycle path use only with additional „moped“ sign
forest path use	yes	no - only for motor vehicle approved streets and paths
insurance	no	yes - at least liability insurance
licence plate	no	yes - small insurance tag
driving licence / "moped test certificate"	no	no - date of birth before 01.04.65 yes - date of birth after 01.04.65, possible from 15 years on
EU operating licence, resp. so called „vehicle documents“	no	yes EG certificate of conformity
continuous rated power	up to 250 W	to 500 W
max. electric support (with pedalling)	25 km/h	45 km/h
pure electric independent drive (pushing assistance), resp. starting assistance at S-EPACs	max. up to 6 km/h	max. 20 km/h (construction/bbH)
min. tread depth tyre	no	yes - min. 1 mm (§36 Absatz 2 StVZO)
<p>* only with construction tested clutch system. Not allowed for EPACs of Winora-Staiger GmbH  ** Until now there are no helmets decalred as suitable.  *** please see the information regarding use of trailer in chapter „proper use“</p>		

## BASICS

### What does environmental responsibility and environmental management mean to Winora-Group?

Product responsibility obligates the manufacturer to proper disposal and environmentally friendly recycling, even when the products reach the end of their lifecycle.

Winora-Group sells its products in over 40 countries worldwide. We take responsibility for the disposal of our goods beyond German borders and offer licensed products in compliance with national environmental regulations in many countries.

The increased manufacturer's responsibility mainly concerns the return and use of your electrical devices, packaging and/or batteries as well as accumulators.

### What are the international regulations for electrical devices, batteries and packaging?

#### Electrical devices – WEEE

Worldwide, there are numerous statutory stipulations and directives which define the return and disposal of electrical devices. The internationally most familiar regulation is the European WEEE directive 2002/96/EC. It states, among other things, the environmental-friendly disposal of electrical devices (WEEE – waste of electrical and electrical equipment). In 2012, the WEEE directive (2012/19/EU) was amended by various important changes.

#### Batteries

Many countries have also obligated manufacturers, amongst others, to handle take back and recycling issues. In addition to the European EU battery guideline 2006/66/EC, many other laws exist worldwide that regulate the take back and disposal of batteries and accumulators.

#### Packaging

Any packaging waste in connection with the sale of the products falls under the country specific take back obligations as part of the extended producer responsibility.

The EU Packaging Waste Directive 94/62/EC is probably the most common legislation in this field.

### Which products and/or components are affected by the three main categories?

#### Electrical and electrical devices (WEEE)

According to the WEEE directive, many products of Winora-Group are considered as electrical devices. For instance, the entire eBike, excluding batteries, counts as electrical device. In case that single components of the drive unit have to be disposed they also count as waste of electrical and electrical devices. Furthermore, the following bicycle components are also affected by this definition: LED headlights, LED rear lights, bike computers and parts of electrical gears or damping systems (without batteries as well as further electrical equipment).

#### Batteries (Li-ion and various other sorts of batteries)

In general, all sorts of batteries and accumulators are affected by the regulations. The majority of our batteries are lithium-ion batteries for our ePerformance products. Additionally, it includes smaller batteries like display batteries, batteries in electrical gears absorption systems as well as disposable batteries and accumulators in miscellaneous equipment.

#### Packaging (transportation and sales packaging)

Winora-Group sends all of its vehicles and bike parts to retail in cardboard packaging. This transportation, and partly also sales packaging, mainly consist of paper, cardboard and plastic.

## RECYCLING STEPS

### Which tips and advices for disposal and recycling does Winora-Group give to the end consumer?

#### Entire vehicles

Do not dispose your vehicle in household waste. Dispose it at a community garbage pick-up site or at a recycling depot. As an alternative, you can also dispose it at pick-ups which are organized by community or private companies. Please contact your responsible community or city administration and/or mind letters in your mail.

#### Electric elements and batteries

In Pedelecs, S-Pedelecs and bicycles with electric gear or damping systems, all batteries or removable components have to be separated from the bike beforehand. This includes drive unit batteries, displays with fixed battery, batteries located in or on the frame for gear or damping systems, and so on. Removable displays with fixed battery, displays which have a working display after removal of the handlebar holder and without recognizable battery case on the rear side, are to be disposed in complete. It is only permitted to open a battery case which is reachable from the outside (usually a button cell). The display casing is not to be opened in order to remove a fixed battery. Fixed display batteries are usually lithium-ion batteries and thus hazardous waste. They must not be disposed in household waste. Instead, they have to be collected at a community garbage pick-up site or at a recycling depot. This also applies for replaced batteries which were removed due to wear or a defect. Please also mind the information in the chapter ‚Safety information/ Battery safety information‘ in the complementary manual for Pedelecs and S-Pedelecs. Standard batteries, so-called portable batteries, can also be disposed at community garbage pick-up sites or at a recycling depot and also in battery collection boxes which you can find in different shops. After removing the batterie(s), the remaining vehicle is regarded as electric device and has to be brought to a recycling site separately. Your dealer, the community garbage pick-up site or the recycling depot can help you with further questions.

#### Electronical components and equipment

LED headlights, LED rear lights or hub dynamos, as well as equipment like bicycle computers or navigation systems, also have to be disposed separately after being removed. Please collect such parts at community garbage pick-up sites or the recycling depots.

#### Packaging

Packaging protecting your bike during delivery, so-called transportation packaging usually can be handed to the dealer. All other sorts of packaging have to be sorted and disposed. Dispose cardboard and carton in the waste paper and foils at the recycling depots or ask your dealer about correct disposal.

#### Tyres and tubes

Tyres and tubes sometimes cannot be disposed in the household waste. Ask your dealer whether he takes on the collection and disposal or dispose them at the recycling depot, community garbage pick-up site or city administration.

#### Lubricants and care products

Do not dispose lubricants and care products in your household waste, in the canalisation or the environment. These products have to be brought to special waste sites. Follow the information on the packaging of the lubricant or care product.

## REASON FOR RETURN OF BIKE

---

---

**\* Please note the following points for each bicycle return:**

- Submit this service form together with the end-user invoice and the service summary.  
Only upon submission of this can a return be made.
- Only complete, cleaned and packaged bicycles will be accepted. The pedals and any customised attachment parts must be removed and the handlebars turned lengthwise.
- Always attach the key to the wheel and send the charger

**Have you already tested the following?**

- Voltage available in the battery?
- Connecting sockets tested for tightness?
- Is the software up-to-date?
- Error code: \_\_\_\_\_ Software version \_\_\_\_\_
- For TranzX drives: calibration, chain tension
