Continental Accessories 2017

Clothing/POS/Shop systems

Equipped first-class

Whether it be on a racing bike, mountain bike or just outdoors or in the workshop - first class fit, great quality and smart look: With the Continental clothing and accessory collection, you are perfectly equipped. As with our tyres, our clothing and accessories stand for optimal quality and functionality.

With the current shop system and the new Gondola system your store is equipped optimally. The presentation of merchandise can be positioned in the best possible manner.

Clothing for cycling, leisure and accessories

Men's short-sleeved cycling jersey

Short-sleeved cycling jersey for the ambitious cyclist with great features and pleasant and comfortable wearing. Great moisture management by means of ventilating, moisture-resistant functional material. Aero-material about the arms reduces air resistance and emphasizes the sportiness. Body-hugging, casual fit. Full-length covered zipper, covered front zipper, three back pockets with zippers and an additional rear pocket with a zipper. Reflecting piping. 100 % Polyester.

"Since my childhood which I spent on
 Skye I dreamed of biking the Cuillin
 ridge. The project had to be planned
 over quite a long time and it is
 probably one of the most arduous
 physically. It was a matter of the heart
 to show the isle to the people and fill
 everyone who lived there with pride to
 live in such a place of beauty."

For a good sole need ...

The basic ingredients for a sole that will not slip are the profile and the rubber compound. On loose terrain such as gravel, chippings or mud the profile's studs provide stability. The rubber is crucial for a good grip on smooth surfaces such as boulders or granite slabs.

New TRAXION® outsole with Continental® rubber compound Technology partner for radical grip

In their quest to meet the demands of top mountain athletes, the shoe developers at adidas looked for a special combination of material and sole design. They found an appropriate recipe with the ideal technology partner who knows how to produce excellent grip and has long been a sports enthusiast: Continental®.

The cooperation between the adidas sports brand and the tyre specialist Continental® is the perfect blend of shoe know-how and rubber expertise. As a premium brand Continental® has 140 years experience of rubber compounds and is now one of the world's leading suppliers to the automotive and bicycle industries. For the tyre experts, safety and maximum performance are just as much the watch-words as they are for the sports professionals at adidas.

The close cooperation between Continental® and adidas resulted in a hiking boot that provides perfect safety and stability in all conditions and thus guarantees absolute control and enjoyment.

**Up to 30% more
grip on dry and wet
surfaces.***

*Compared to similar shoe models available on the market.

It's all in the mix

For the sole of the TERREX™ FAST R a rubber mixture was developed by Continental® and adidas inspired by the proven BlackChili Compound used in biking. In order to determine the optimal rubber composition Continental® and adidas conducted tests and compared results in the laboratories for months until all experts were satisfied.

Perfect grip whatever the weather

The material's high performance meant that the adidas shoe designers could create a very open profile.

Only the combination of CONTINENTAL® rubber compounds and the innovative sole design makes outdoor athletes faster and safer in the mountains. Practical tests served to back this up. A comparison with similar models available on the market shows that the CONTINENTAL® rubber compound offers up to 30% more grip on dry and wet surfaces.

adidas TERREX™ FAST R - on Conti

Continental is the rubber of choice for the athletic TERREX™ FAST hiking shoe line. Even at a high pace and both under dry or wet conditions its grip is convincing. The TERREX™ FAST R guarantees lightness, stability as well as an excellent control of the terrain surface making it multi-functional. The FORMOTION™ unit of the heel offsets uneven surfaces, the TERREX™ + CONTINENTAL® lowers the rolling velocity and reduces the impact on the joints. As is fitting for shoes with the name "fast" they are equipped with a quick-lacing system that will not give in even during heavy load when going downhill. Whoever is planning a long tour with a bigger backpack and who requires more stability, but also wants a light shoe, should go for the FAST R of adidas.

CONTI™ shop system combinations

Attractive and clear presentation of goods is always crucial in the cycling business. It must be qualitative as well as having a convincing external appearance.

Through suitable product presentation for individual products, an atmosphere is created for the customer in which they feel comfortable and where they like to spend their time learning about new products.

Individual stand - big impact

Bicycle tyres should be displayed suspended due to their dimensions so they can be viewed properly. Nevertheless professional display systems rarely offer convincing solutions

for high-quality bicycle tyres. With the CONTI™ shop system combination, we are offering you several individual presentation possibilities for your specialist shop. Clearly arranged and space-saving, you can display your Conti bicycle tyres in a modern, modular shop system and draw your customers' attention.

With the help of this combination you can display a variety of clincher tyres in your showroom, even in the smallest of spaces.

CONTI™ shop display folding tyres combination

[A] CONTI™ shop display 125 cm [folding tyres combination]

This shop system serves to display approx. 20 clincher tyres, approx. 100 tubes, approx. 50 folding tyres without accessories. It offers the possibility to attach a leaflet stand and the option to integrate a monitor.

Small stand – large appearance

You can display your products exactly how you like and integrate the different types of systems with one another. Do you need system combinations for folding or clincher tyres or just a display for tyres? We can offer you a variety of combination possibilities of individual modules. The combinations are available in a width of 125 cm and 66.5 cm respectively or the Combination Plus at 3 × 125 cm.

[G] CONTI™ shop display 125 cm combination DUO

This shop system serves to display approx. 100 clincher tyres, approx. 200 tubes, approx 60 folding tyres, without accessories. It offers the possibility to attach a leaflet stand and the option to integrate a monitor.

Measurements: 2,580 × 1,250 × 680 mm

Setting up is carried out by each retailer himself.

Partnership

The CONTI™ shop system combinations shall pass over into my ownership. I hereby undertake to carefully assemble and maintain the module. Under no circumstances shall any other tyre or tube brands or third party advertising be displayed in the combination.
